

MANUAL WATER DISPENSER

First Use

1. Be sure, that you have enough ventilation holes behind your device.
2. Put the tube inside the water bottle.
3. Connect the circuit.

THE PUMP WILL AUTOMATIACALY FILL THE COLD-WATER AND THE HOT-WATER TANKS, UNTIL THEY ARE FULL.

WHEN THE PUMP STOPS, THE DEVICE IS READY FOR USE.

4. Press any of the buttons
HEAT WARM or COLD , in order to start using *LaVie*

Afterwards Use

- . When the bottle is empty, the device will issue a WARNING SIGNAL (beep)
- . To replace the bottle, open the door, remove empty bottle and install the new one
REPEAT NO. 2
- . After you close the door, the pump will refill the tanks and the device is ready again.
